

10th INTERNATIONAL ABALONE SYMPOSIUM

1st ANNOUNCEMENT

We are pleased to invite you to the 10th International Abalone Symposium, which will be held in XIAMEN, China, from May 8 to 12, 2018.

In 2018, the International Abalone Symposium returns after 15 years back to China – center of the world's largest abalone aquaculture area. As we all know, about 90% of the world's abalone in 2016 was produced in China, in which about 80% of the abalones were from Fujian Province, where Xiamen City is located.

The IAS 2018 programs will follow the tradition and focus on the fisheries management, physiology and ecology, aquaculture technology, processing and marketing. All programs have been developed to facilitate and promote communication through social events, abalone festival, exhibitions, workshops, plenary speeches, oral presentations in theme sessions, and poster presentation sessions.

ABSTRACT TOPICS

- The International Market and Country Production Updates
- Fishery Management and Related Abalone Ecology
- Restocking / Conservation / Climate and Environment Impacts
- Genetics / Genomics (For Aquaculture, Fisheries and General)
- Aquaculture Production (Including Breeding, Nutrition, Health, Physiology, Disease Control Etc.)
- Processing and Marketing
- Other Abalone Related Topics
